PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of experience designing and delivering scalable, production-grade web applications using the **MERN Stack** (MongoDB, Express.js, React.js, Node.js). Proficient in RESTful API development, JWT Authentication, Role-Based Access Control (RBAC), Redux Toolkit, TypeScript, and Tailwind CSS. Demonstrated experience in MongoDB query optimization (indexing, aggregation pipelines), Agile/Scrum methodology, Git-based version control, and end-to-end SDLC. Codeforces Rating 1128 | 153+ DSA problems solved.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, C++, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, GSAP, React Router, Axios, Vite, Responsive Web Design, Cross-Browser Compatibility

Backend: Node.js, Express.js, Spring Boot, RESTful API Design, JWT Authentication, RBAC, Middleware, MVC Architecture, API Security, Session Management

Database: MongoDB, Mongoose, MySQL, Aggregation Pipeline, Compound Indexing, Query Optimization, Schema Design, Performance Tuning

Tools & Practices: Git, GitHub, Postman, VS Code, npm, Agile, Scrum, SDLC, Code Review, Debugging, CI/CD Concepts, Google Maps API

WORK EXPERIENCE

Software Developer Intern – MERN Stack

February 2026 – Present

SuperWebs360

Delhi, India

- Engineered and deployed **5+ full-stack web applications** end-to-end using **MERN Stack**; implemented **mobile-first Tailwind CSS** responsive design resulting in consistent performance across all screen sizes and devices
- Architected **RESTful APIs** in **Node.js/Express.js** with **JWT Authentication** and **3-tier RBAC** (Admin/Moderator/User), enforcing granular access control across all protected routes and reducing unauthorized access incidents to zero
- Resolved critical **MongoDB** performance bottlenecks by implementing **compound indexes** and rewriting **aggregation pipelines**; built a real-estate listings module with location/type/price filtering via **Google Maps API** integration, reducing query latency by ~60%
- Led **Git** branching strategy and code reviews in a 3-engineer team; established **Postman** API testing protocol before every release, cutting post-deployment bugs significantly

Full Stack Developer Intern

June 2025 – September 2025

TVM Private Limited

Jabalpur, India

- Built and maintained **RESTful APIs** for a **Salesman Management System** using **Node.js, TypeScript, Express.js, and MongoDB**; system handled concurrent multi-user load in a live production environment with **zero downtime**
- Diagnosed slow API responses via **MongoDB query profiling**; applied targeted **indexing** and query restructuring strategies that improved API response times by ~65%, directly improving field salesman productivity
- Implemented a **3-tier RBAC system** (Super Admin / Admin / Salesman) with **JWT-secured endpoints**; integrated **Node.js** backend with a **Flutter** mobile app via **REST API** to enable real-time data synchronization for field teams

PROJECTS

Avorix Realty – Real Estate Platform | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS* | **Live** ↗

- Developed a production-grade full-stack real estate platform with **3-tier RBAC** (Admin/Seller/Buyer); Sellers list properties and Buyers filter by location, budget, and type using **MongoDB compound indexing** for fast, scalable search
- Secured all **REST API endpoints** with **JWT Authentication**; integrated **React.js + Vite** frontend to **Node.js** backend via **Axios** with proper **CORS** configuration for secure, production-ready cross-origin communication

BookStore Web Application | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS*

- Built a full-stack e-commerce book platform (browse, cart, orders) with a clean **Controller-Service-Routes** MVC architecture and **MongoDB schema indexing** for optimized read performance under high load
- Enforced **Admin/User RBAC** on all **REST API endpoints**; delivered a fully responsive **React.js + Tailwind CSS** frontend with **React Router** for client-side navigation, compatible across all major browsers and screen sizes

Nike eCommerce Platform | *React.js, Redux Toolkit, Spring Boot, JWT, MongoDB, Tailwind CSS*

- Engineered a feature-rich eCommerce app with product catalog, cart, wishlist, order management, and payment gateway integration; secured all endpoints in **Spring Boot MVC** backend using **JWT + RBAC** for Admin, Seller, and Customer roles
- Leveraged **Redux Toolkit** for centralized global state management across complex multi-component workflows, eliminating prop-drilling and improving maintainability and scalability of the frontend codebase

EDUCATION

Shri Ram Institute of Technology

Jabalpur, India

Bachelor of Technology – Computer Science and Engineering | CGPA: 8.10/10.0

Aug 2020 – May 2024

ACHIEVEMENTS & LEADERSHIP

Competitive Programming: Codeforces Max Rating **1128** (Pupil) | 153+ DSA problems solved | CodeChef **3-Star** (Rating: 1623) | HackerRank **3-Star** in Problem Solving

Leadership: Team Lead, Training and Placement Cell | Volunteer Head, Tech Fest | Class Representative, Computer Science Department
